Provider Name:Office Phone Number:	Provider Signature:Office Fax Number:
Attending Physician Name: Note: This order is valid for 12 months from date of physician signature.	(If ordering provider is an advanced practice practitioner, attending physician required)

PRBC ADMINISTRATION ORDER SET

The following Standard of Care Protocol has been approved for use in the Infusion Clinic at Trinity Health Grand Haven.

INTRAVENOUS ACCES AND LINE CARE PROTOCOL			
Type of Intravenous Line	 ✓ Peripheral Access. ✓ May leave Peripheral Access in place if consecutive Infusions are ordered (greater than or equal to daily) ✓ PICC Line ✓ Discontinue PICC Line at the end of Infusion Therapy ✓ Implanted Port ✓ De-access Port if Infusions are less than or equal to weekly. De-access port at end of Infusion Therapy ✓ Midline Catheter ✓ Discontinue Midline at the end of Infusion Therapy ✓ Central Line (Non-tunneled) ✓ Discontinue Central Line at the end of Infusion Therapy 		
Line Care	 ✓ Peripheral Access: Scrub the positive pressure injection cap(s) with alcohol for 30 seconds prior to accessing the line. ✓ All other Access types: Scrub the positive pressure injection cap(s) with chlorhexidine for 15 seconds prior to accessing the line. If allergic to chlorhexidine, use betadine scrub for 30 seconds prior to accessing line. ✓ All Access types: Change dressing every 7 days and PRN if soiled or non-occlusive ✓ Biopatch to all Access types except Peripheral Access ✓ If Implanted Port, change Huber needle with dressing change every 7 days. 		
Line Flushing	Flushing protocol ✓ Peripheral Access flush with 3mL of 0.9% sodium chloride before and after each medication administration ✓ All other access types: Flush with 10mL 0.9% sodium chloride before and after each medication administration or 20 mL 0.9% sodium chloride after blood draw ✓ Flush capped lumens with 10mL 0.9% sodium chloride daily if lumen not in use. ✓ Implanted Port: When de-accessing, flush with 10mL 0.9% sodium chloride and follow with 5mL of Heparin 100u/mL.		
General Care	 For all Access types except Peripheral Access ✓ May use Line for lab draws ✓ Minimum of 5 mL of blood to be withdrawn and wasted prior to obtaining blood samples, administering medications or flushing port. ✓ Only 10 mL size syringe to be used to withdraw samples or flush catheter. 		
Occlusion	 ✓ If unable to flush line, administer Alteplase (Cath-Flo) 2mg ✓ If unable to flush line, notify Physician of occlusion ✓ STAT portable chest x-ray after insertion Reason: Line Placement Confirmation 		

PRBC ADMINISTRATION ORDER SET
